UNT BRIDGE

How To Change Your Default Language on Bridge

NOTE: Changing the default language on Bridge **DOES NOT** change the course language. It will only change the Bridge Platform and Certificates.

STEP 1: Navigate to the Apps & Settings bar on the bottom left corner of the screen, and click on the gear icon. This will open the Apps & Settings banner.

STEP 2: Once the Apps & Settings banner is open, navigate to the language drop-down box and click on your language of choice. This should update the default language.

STEP 3: In case the language did not update, refresh your Bridge or clear your cache.

Step 1

Step 2
